With Man Misself Market and the second country of the second count

hours, which the Alaska has repeatedly done, there may be room for wonder whether it may be possible to puch atcamphips to yet higher appeal: So well has the Alaska successed that her pwners have resolved to hurrow amothe. Amer can name for the steamanip they are building ad expect to have in readings by midsummer. The Oregon is intended to excel is speed the fast-est ship affect. She will not be much larger than the Alaska, but her engines are to indicate no less than 13,000 horse power. She will have but one seres, about tweety-four feet lo dismeter, with a pitch of nearly forty. Steam will be supplied by we've boilers, each with six . The O seep will burn about twenty pounds of coal per square foot of grate per hours will not be green under 300 tons. The to the requiry as to how the law operated in local weight of water crysporated to ranke her practical the right amount of the state of the whole of a short of three times that of the whole ultra-prohibitions is have accepted the general ship's eargo, engine and all. Assuming that as beang evan preferrable to a problishery law, she makes twenty knots an heur, the threst of taking Kausshess at evan ple. As, an illustrators except that is to say the force pushing her on the induced place of the induced through the water—will amount to over start I would eligh that it Lincoln, helped the and an interpretation of the most powerful locomotive originate would technic advanta, which was dept by exert if all were pulling at her together. Ships charac orders much at the repet, either 800 to \$100,000 nearly one half of which is nine; they are in it is han be of responsible men,

cas defeated. The week day the Sti Louis Republican arged to adoption of high license as the proper method of dealing with the subject. The day-produces are alts is worth to juny following and of the subject with auteons as the interest of the license system has some shipted of rate of release for near the business, and note interests. It is seen in the business, and note interests in the second plan mont legitimate mode of resting revenue; it is a ax up on lexibles the man who details the lapter gaps the tax after all, and the capit it is a ax up on lexibles; the man who details the lapter gaps the tax after all, and the capit it is a capit it pay it because it is not necessity, the can is worth it however.

As an argum of for securing decrease of license flow and reduction of stee no decrease the first passing a high i coince law."

In the report of the sear route this which leaves the formula of that city is published maps showing the license flow property is published maps showing the license seal there is the color of such pages of certain parts of the showing the license and the whole lease at every they child be the meant the flow of the streets to make the state of the streets through the s
